

Archetype_2

n: 463 Enrichment p-value

Transport of small molecules
central nervous system development
gliogenesis
extracellular structure organiza...
response to drug
small molecule biosynthetic process
ossification
myelination
response to wounding
cell-cell adhesion
organic anion transport
bone mineralization
sensory organ development
neuron projection development
positive regulation of transport
carboxylic acid metabolic process
cell morphogenesis
animal organ morphogenesis
Extracellular matrix organization
negative regulation of cell diff...
regulation of nervous system dev...
brain development
cofactor metabolic process
small molecule catabolic process
regulation of neuron differentia...
response to mechanical stimulus
epithelial cell proliferation
lung development
urogenital system development
morphogenesis of an epithelium
growth
sulfur compound biosynthetic pro...
skeletal system development
tube morphogenesis
regulation of cell adhesion
molting cycle process
ECM-receptor interaction
carboxylic acid transport
